

ENJOY ALL THE BENEFITS OF ENERGY SAVER MODE:

Now available on the Henny Penny LOV fryer.

HENNY PENNY
Engineered to Last

Henny Penny is always working to help operators save time, money, and energy. That's why Energy Saver Mode (ESM) is now available for the LOV fryer, giving crews the power to more effectively manage equipment and reduce energy use during less busy periods. When the fryer is idle for 30 minutes, ESM is activated — automatically dropping the oil temperature and, as a result, consuming less energy.

Average
yearly energy
savings between
\$50 - \$120
per vat.*

- Available for both gas and electric LOV fryers
- Vat switches to Energy Saver Mode (ESM) after 30 idle minutes
- ESM can be ended with one button; vat heats back up in just minutes
- Each vat is controlled separately
- Vat activity can be tracked and monitored
- ESM can be triggered automatically when individual vats are not in use
- Manual option allows crews to put vat in ESM with the push of a button
- Timing and idle temperature settings can be customized
- Control panel displays "Idle" when ESM is activated
- "Wake Up" Mode quickly returns fryer to ideal cooking temperature

ESM is available on all Henny Penny LOV fryers built in 2014 or later. As a default setting, ESM is turned off — operators should check to see if ESM is activated.

2016
ENERGY SOLUTIONS
AWARD WINNER.

SEE WHAT OPERATORS ARE SAYING ABOUT ESM:

"We are an extremely high-volume store and have high expectations for our equipment to be reliable and ready when we need it. Energy Saver Mode has been excellent. It has provided energy savings opportunities for our store without any negative operational impacts."

— **BRENT WALKER**, General Manager
Merrillville, Indiana

"Energy Saver Mode addresses the need to reduce energy demands for our kitchens and it does it automatically, which is awesome. Our managers don't have to babysit the fryers, they just know it is going to manage that piece of the business for us."

— **RANDY BLAICH**, Area Supervisor
Hamilton Group

* Based on recent data from stores testing the ESM feature.
